DD/A/ODP   WEEKLY REPORT

Week of 16-23 September 1977

I. Major Activities During the Past Week:

A. Support to O/Compt.

PAS - Survey of intelligence production publications
to determine the value of collection sources. A CROSSTABS
procedure and updated documentation were delivered to the
customer. This procedure graphically displays the relation-
ship between Key Intelligence Questions (KIQ) and source
documents which contain material on the KIQ.   ██████████ STATINTL

B. Support to OGCR

CARTDEV - Developmental support to Cartography Division.
Conversion of the U.S. Forestry's line-of-sight program
was completed. Documentation and production procedures
were delivered to the customer. The program determines
which points in a digitized terrain array are visible from
any of 50 viewpoints. Ouput from the program is a CALCOMP
plot that may be overlaid onto a map. ██████████
                                                    STATINTL

C. Support to OTR

PREVMAIN - A system for preventive maintenance for
OTR. A demonstration was presented to the customer ██████ STATINTL
The customer was pleased with the data input method (i.e.
menus). The demonstration was unfortunately aborted early
due to communication line failure.

STATINTL   ████ personnel will be able to input data starting on
1 October. However, the customer anticipates it will take
until 1 January 1978 to gather the data. Any reports
produced before the installation of a printer will be
printed at Headquarters and pouched ██████   STATINTL

STATINTL

████████████████(Engineering Division) has asked
that the printing requirement for this application be
fulfilled with an IBM 2741. Engineering Division will
provide an estimated installation date. ██████████   STATINTL

D. Support to OP

PERSIGN - Integrated Personnel Information System.
The PERSIGN analysts working on the EOD specifications
are re-evaluating their progress against the target date
of 21 October and re-assigning some tasks within their
group. Some problems that they have dealt with are:
1) Underestimated work load in general, 2) Increased time
on certain specifications as a result of making them
multi-purpose; i.e., adding a little more logic so that
certain specifications can handle actions other than the
processing of just the EOD. ███████████████   STATINTL

PERSIGN-MAINT. We have completed the changes and
testing of the HRSMCS conversion programs (P412002 and
P412003). The changes will eliminate the errors in
processing of MAX salary cases and the errors in pro-
cessing pending reassignment and development complement
STATINTL cases. ██████████████

E. Support to OF

1. GAS - General Accounting System. We forwarded to
    Production Division the necessary forms required
    for off site storage of GAS data. They will
    review the forms and we will have a meeting with
STATINTL   OF to finalize all requirements for GAS backup
    off site storage. ████████████

2. AGEPAY - Preparation of agent's payroll records
    and entries for unvouchered payroll. We completed
    a special request to extract AGEPAY data for the
    purpose of printing a hard copy Individual Earning
    Record. These will be reviewed by OF for necessary
    adjustments prior to the close of the 1977 tax
STATINTL   year. ██████████

F. Support to OCR

OCRDIR - Automation of the OCR directories. We have
completed development of the standardized Basic Organiza-
tion (BO) menus and procedures, and have begun development of
a Directory of Current and Past Positions (DY) menus and
procedures. We expect to complete the development of the
DY menus and procedures by Mid-October. This will mark
the end of the development of all update menus and pro-
cedures required for maintaining standard directory data.
The development of the menus and procedures for the
